Baa Atoll UNESCO Biosphere Reserve

Dhigufaru is located in Baa Atoll, one of the 20 atolls which makes up the Maldives, and the only one to join the illustrious list of international UNESCO Biosphere Reserves. Comprised of 75 different islands, with 57 remaining uninhabited, Baa Atoll boasts some of the richest reef systems in the world, supreme setting for diving, and marine conservation.

dhigufaru
island resort
maldives

Nestled on the protected Biosphere reserve of Baa Atoll, Dhigufaru meaning “a long reef”, is the epitome of what you would imagine as an exotic getaway.

The island itself has very characteristic natural features, making each part of the island quite unique and special in its own way.

Boaku

The seclusion and stillness of the water inside Boaku, makes it perfect setting to catch the sunrise as well as secure place to let your children play.

Veli

Veli, a very wide and expansive flat beach of pure white sand, with crystal clear turquoise water that goes on and on.

Aanu

The beach rock goes along the northern edge & length of the island, giving the island its unique shape, character, and natural protection.

Beach Villas Stunning views and access to the beach front from each hut, you have the choice of experiencing the serenity and tranquility of the eastern facing Boaku, or the stunning magnificence of the Veli beach.

Semi Water Villas Perfectly placed to catch the sunrise, with magnificent views of the horizon, our water villas allows you to have direct access to the Dhigufaru lagoon from the Aanu Sandrocks, from your own expansive private sun deck.
